**Release History**

| Release Number | Release Date | Brief Summary of Changes |
|---|---|---|
| 1.6 | 31.03.2010 | Miscellaneous changes in field type and length in multiple tables |
| 1.7 | 20.04.2011 | Changes made with respect to EX-BOND BE, RSP and BOND |
| 1.8 | 22.05.2012 | Declaration of VAT Particulars along with Item Details in Item-level Declarations. |
| 1.9 | 23.05.2012 | • Mode of declaration of VAT Particulars as specified Item-wise in Version 1.8 is reversed<br>• New mode of declaration of VAT details at BE level defined. New Segment CTX introduced. Changes reflected in Message Format and Declaration Form. |
| 1.10 | No Release | Only technical Document Released for version 1.10. No change in Message Format. |
| 1.11 | 29.01.2014 | • Change of Document Name from CHA-Customs Message to BE Message<br>• Modification in the instructions/ guidelines for IGMS segment of BE Message format (CACHI01 Part 15/18) to accommodate Sea-to-Sea transshipment option.<br>• Truck No field added in CONTAINER segment of BE Message format (CACHI01 Part 16/18) to accommodate requirements of LCS Cargo Transport<br>• BE Declaration Form re-formatted<br>• Document re-structured |
| 1.12 | 10.07.2014 | • Changes w.r.t. Budget 2014<br>• Modification in the instructions/ guidelines for ITEMS segment of BE Message format (CACHI01 Part 6/18) to accommodate Notification for Central Excise Exemption of education cess<br>• Ecenvat_notn,slno field added in ITEMS segment of BE Message format (CACHI01 Part 6/18) to accommodate requirements of central excise education cess exemption<br>• BE Declaration Form re-formatted<br>• Document re-structured |
| | | • Single Window Declaration Added for Item Identification per Item.<br>• Document Re-structured. |
| 2.1 | 29.12.2015 | • Document Re-structured<br>• Changes done in SW structure, CACHI01 Be Mesg is 24 part message. BE-item_sw_info_type, BE-item_sw_const, BE_item_sw_prod, BE_item_sw_ctrl are added. Directories for Single Window and Agencywise Filing Guide are separately published. Statement (Part 23), and SupportingDocs (Part 24)<br>• Fields added in Invoice(Part4) are Third Party Name and address details, Authorized Economic Operator (AEO) Code and AEO country.<br>• Fields added in Item(Part 6) are Item Manufacturer /producer code and Details . Intended end-use is a now a code and is mandatory<br>• Supporting Docs(Part 24) and Statement have fields declaration type/date instead of BE No and date. Decl. Type is added. |

| | | |
|---|---|---|
| 2.2 | 21.06.2017 | • Addition of GST related information in CTX.<br>Commercial Tax Type includesV/C/S/G/A/P/I/T/O/D.<br>Commercial Tax Type :VAT/CST/ST/GST-IN/Aadhar/Passport/Income Tax Pan/Tin No/GST Govt/GST Diplomat<br>• SBE Duty – Exemption Notn No and Exemption NotnSrNo |
| • 2.3 | 11.08.2017 | • Unique document no field in Supporitng Docs changed to Image Reference No.<br>• Misc charges and misc. rate are optional in Misc_Ch table. (06/11/2017) |
| 2.4 | 02.03.2018 | • CEX Educess Notn and CEX Educess Notn Slno are renamed as Social Welfare Notn and Social Welfare Notn Slno . |
| 2.5 | 21.05.2020 | • Separate header(HREC) for BEAmendment – CACHI01-A<br>• File naming for amendment BE is .beamd.<br>• Duty Type “C” for Customs.<br>• Addl Duty Flag, customs health cess as “+”<br>• Commercial Tax Type – GST-Non Resident Taxpayer is Added As “N”<br>• " For claiming exemption under the notification 024/2011 for copper concentrates, RSP applicability Flag may be declared as "C" in the item table of the Bill of Entry. Further, in the RSP table, the notification 024/2011 has to be provided and the value of the gold + silver has to be entered in the RSP column."<br><br>"In case of Exbond BE, incase of In-bond transfers, flag "S" in RSP Applicability column against each item. Correspondingly, the last transaction price should be indicated in RSP Amount colum with "SALE" as RSP Notification Column in RSP Table."<br>• BE Amendment codes are added. |
| 2.6 | 26.08.2020 | • SEC65 XBE Changes<br>• Columns contrl msr,contrl uqc and control Slno are added in table segment BE_ITEM_SW_CTRL<br>• In case of SEC65 XBE the following have to be declared in this segment<br><br>Control Type Code --- SEC65; Control Location --- Warehousing Code<br>Control Start Date---Warehousing date;Control End date -- -GST Invoice Dt<br>Conrol Result Code---GST Invoice No (16 Char)<br>Conrol Result Text---CTH followed by Goods Description of Finished Product(both separated by any Delimiter) ; Control MSR---Quanity<br>Control UQC--- Unit Qunatity Code<br>Control Slno --- Serial No. of GST Invoice (An Item can have Multiple GST Invoice) |
| 2.7 | 14.09.2020 | • Whenever FTA notn is calimed at the item level, following things are mandatory<br>(a) Declaration of COO certificate details in the sw_info_type table<br>(b) Tansit country at the item level is mandatory. It can be same or different than the country o origin. |
| 2.8 | 28.07.2021 | • Statement Table – Declaration of Mandatory document Exception and making job no and job dt as ‘X’ and BE_no and BE_dt as M for supplement messages.<br>• Inclusion of amend code S_STMT and A_PBEIGM<br>• Budget 2021 Changes related to AIDC in SBE_DUTY<br>• Changes related to amendment A_PBEIGM in SBE_IGMS. |

| | | |
|---|---|---|
| 2.9 | 02.09.2021 | • Date type and width of Item Sr. No. in License under message ID CACHI01 (Part 7/24) has been changed to (C )har 10 from (N)umber 4 |
| 2.10 | 28.02.2022 | • For availing IGCR benefits Importer mandatorily declare the IIN number in certificate number column and certificate type as EI in segment <TABLE>CERT.<br>• Certificate Date is made optional for IGCR.<br>• In addition, the bond code should be declared as 'EI' along with the bond nummber registered by the importer against the IIN, and the port code where the bond was accepted. |
| 2.11 | 30.09.2022 | • Capturing of Additional Information for COO along with Existing |
| 2.12 | 10.03.2023 | • SEZ Changes |
| 2.13 | 08.11.2023 | • Provision to file BE with CVD Levy Notification<br>• Changes w.r.t filing of BE w.r.t. online COO certificate received from Korea |
| 2.14 | 06.05.2024 | • CAVR Changes<br>• Additional flags in column importer typein BE MAIN segment for SEZ T & M Type Bes. |
| 2.15 | 20.07.2024 | • SEZ T Type against multiple Z type BE – be_item_sw_ctrl<br>• SEZ Z Type AP – Authorised Person changes – be_item_sw_info_type<br>• Warehouse BE no and date columns made optional for all SEZ BEs. |
| 2.16 | 14.08.2024 | • Column length of Supplier name and address of Invoice have been increased to 100. This is done for storing client information in case of Z type SEZ BE<br>• Column length of Seller name and address also incresed to 100.<br>• Importer Type T (sample Testing) added for T & M type SEZ BEs |
| 2.17 | 21.10.2024 | • S-type BE for SEZ – BE for DTA Sale. BEs which are filed in SEZ Online and DTA sale through ICES. |
| 2.18 | 07.11.2024 | • Importer type S (Ship Stroes,Cruise Ship Purchase); V ( vessels,charter vessele and vessel repair) ; A (New Aircarfts ) are added for H & Z type BEs. |
| 2.19 | 16.12.2024 | • Hand Carriage Jewellery – Importer type H added for H type BE filed at Air Cargo sites |
| 2.20 | 27.01.2025 | • Importer request for provisional assessment. |
| 2.21 | 29.04.2025 | • Hand carry module for gems& jewellery, sample and prototype. Mandatory declaration additional qualifiers under single window table. |

| | | |
|---|---|---|
| 2.22 | 29.07.2025 | • Provision made for filing Uncalimed Cargo – Importer type I added.<br>• CCDC Meity certificate declaration made mandatory. |
| 2.23 | 20.08.2025 | • eBond declaration while filing Bill Of Entry. |
| 2.24 | 22.09.2025 | • <TABLE>BE_ITEM_SW_PROD made mandatory for FSSAI.<br>• Mnf date and expiry date are mandatory for FSSAI |
| 2.25 | 16.02.2026 | • Changes done for SEZ to CBW movement<br>• New type W with imp type T/M added for movement from SEZ to CBW<br>• Z with imp type W for movement from CBW to SEZ |
| 2.26 | 24.06.2026 | • 18A Revision changes |
| 2.27 | 04.09.2026 | • Change done for SEZ to SEZ Movement (Inter SEZ Movement)<br>• BE type Z with importer type B (trading as it is) and F (Manufactured goods) for Inter SEZ movement. |

# 1 Introduction

Service Centre module provides a host of services to the external stakeholders - Customs House Agent (CHA), Shipping Agent (SA), Consol Agent (CA), Importer/Exporter and so on. Data Entry/Processing personnel deployed at the Service Centre act as the human interface between these service-seekers and Customs and they use the ICES Service Centre Module to process the end-user requests.

**Some of the key facilities provided through Service Centre Module are:**

- Job Creation
- Checklist Generation
- Job Submission
- Amendment request entry
- Query print-out & entry of reply
- Printing of processed documents
- Printing of duty Challans
- Document Status Enquiry
- Submission of EDI documents through Floppy

**Key documents processed through Service Centre**

- Input
  - Bill of Entry
  - Shipping Bill
  - IGM
  - EGM
  - Consol Manifest
  - License
  - Amendment Requests
  - Query Reply

Under consolidated environment, the Service Centre application would be running on a system isolated from ICES. However, the application will have access to the required directories. The document processing flow is described below:

**Document entry:**
The application will enable creation of document. Only Directory validation will be done in the entry stage License, Bond and IGM validation will be carried-out at the ICES-end at processing stage.

**Checklist printing:**
Provision will be given to operation for generation of Checklist.

**Submission:**
The submission process would flag the job for submission to ICES and insert a record in Control Table

**ICEGATE:**
The ICEGATE application has to select the Job from the Control Table and pick up the data from the view /table in Service Centre and update the Control Table. The ICEGATE application will put the information irrespective tables in the ICEGATE schema and an entry in Control Table for information to ICES for processing.

ICEGATE will also pick acknowledgement (negative / positive) information from ICES view / table and populate in Service Centre table and insert / update control information.
Module will also be provided in the Service Centre to view/ Print error list / acknowledgement.

**ICES:**
Data Processing at ICES will be similar to remote submission.
For information on query, entry of reply for the query, and processed document print the process will remain the same.

# Message Specs and Declaration Format

## Message Specification

Agencies involved in international trade have already automated their processes and are in a position to generate text file of the documents for transmission to Customs. In order to facilitate this work, NIC at the instance of the Customs and Trade, is distributing file formats in which ICES 1.5 accept data.

This document explains in detail the message formats with respect to the import declaration i.e. Bill of Entry (BE) related messages, which are as follows:

## List of Messages

| Sr. No. | Message Description | From | To | Message |
|---|---|---|---|---|
| 1. | Bill of Entry | CHA/Importer | Customs | CACHI01 |
| 2. | Bill of Entry Amendment | CHA/Importer | Customs | CACHI01_A |
| 3. | Acknowledgement | Customs | CHA/Importer | CHCAI02 |
| 4. | Negative Acknowledgement | Customs | CHA/Importer | CHCAI02 |
| 5. | Processed BE | Customs | CHA/Importer | CHCAI04 |
| 6. | Query | Customs | CHA/Importer | CHCAI05 |
| 7. | Query Reply | CHA/Importer | Customs | CHCAI06 |
| 8. | Out-of-Charge BE Printing | Customs | CHA/Importer | CHCAI07 |

# 3 ICEGATE Header and Footer

### ICEGATE Header:

**HREC^]ZZ^]<Sender ID>^]ZZ^]<Receiver ID>^]<Version No>^]<T or P>^]^]<Message ID>^]<Sequence or Control Number>^]<Date>^]<Time>**

**ICEGATE Footer:**

TREC^]<Sequence or Control Number>

Where

| | |
|---|---|
| <Sender ID> | is the ICEGATE code of the Customs House |
| <Receiver ID> | is the ICEGATE code of CONCOR/Custodian |
| <Version No> | is the ICEGATE version being used. Currently it is "ICES1_5" |
| <T or P> | is the test (T) or production (P) indicator |
| <Message ID> | is the message name or id. Ex: CHCOI01 |

**Note : In case of Fresh BE filing , Message ID= CACHI01**
**In case of BE Amendment, Message ID=CACHI01_A**

<Sequence or Control Number>

is a unique value that can be used to uniquely identify the document. i.e. This will be used for tracking purposes. The value currently being passed in the second record can be used here.

| | |
|---|---|
| <Date> | Date of transmission of message |
| <Time> | Time of transmission of message |

The same Sequence or Control Number that is used in the header has to be repeated in the trailer.

Example:

HREC^]ZZ^]ABCD^]ZZ^]XYZ^]ICES1_5^]P^]^]COCHE01^]123456^]20071015^]1015

TREC^]123456

All messages will have Header and footer by default. This will not be included as part of each message separately.

## General Guidelines

Field delimiter: ASCII Chr 29: ^]

If the field information not applicable or available, still the field delimiter shall be given.

Example : Table – Exchange
If the currency code used is DKK, which is a standard currency, then the flat file structure shall be :

DKK^]^]^]^]Y^]^]^]^]

Record delimiter : New line Character

DOS : ASCII Chr 10, 13 - ^M^J
Unix : ASCII Chr 10 - ^J

File naming convention :

<jobno><year>.be
<jobno><year>.beamd
<nnnnn><yyyy>.be

Example: 4571999.be, 12341999.beamd
6891999.sb, 12341999.sb

File name – Maximum length : 8 Characters.

CHAs / Importers have to adopt the Code directories as maintained by Customs for Currency code, Scheme Code, Country code, Port Code, Unit Quantity Code, Package Code and State Code.

All dates needs to be entered in YYYYMMDD format.

### Message Integration:

After picking up data from the Service Center, ICEGATE will put the same in a parallel set of structures in the ICEGATE schema of ICES. These comprise a set of data tables and control tables (In case of a single-table message, Control table and Data tables may be merged). These set of structures are also used to handle the equivalent messages coming over network.

For each set of data picked up from Service Center, ICEGATE will insert the same in the corresponding tables in the ICEGATE schema of ICES and will also update the corresponding Control Table. Based on this, ICES application will pickup data from these sets of data tables, process the same and update the ERR_CD fields in the data tables. ICEGATE will then send the acknowledgement (positive or negative) to Service Center.

**File naming conventions followed for the messages:**

| | |
|---|---|
| Bill of Entry | <File name defined by importer/CHA>.be |
| Bill of Entry-Amendment | <File name defined by importer/CHA>.beamd |
| Acknowledgement | <ICEGATE MESSAGE FILE NO>.ack |
| Negative-acknowledgement | < ICEGATE MESSAGE FILE NO >.nak |
| Processed BE | <Sequence Number>.chl, |
| The message consist ofProcessed BE | <sequence number>.pbe |
| Examination Order | <Sequence number>.peo |
| ChallanQuery | <Sequence number>.qry |
| Query reply | <Sequence Number>.rpl |

**Intended End Use:** This is the principal end-use of the product under import. This data element also serves as the requirement of "purpose of import". A directory **d_intend_enduse** has been created. The data in this field may be taken from this directory

**Accessory Status :** Accessory status has been codified in the following way

0 : Indicates that **no** accessory/spare part/maintenance or repair implements are imported along with the item

1 : Indicates that accessories/spare parts/maintenance or repair implements are imported along with the item. These are compulsorily supplied with the item, and are supplied free of cost with the item (Refer to Rule 2 of Accessories (Condition) Rules, 1963).

2 : Inticates that accessories/spare parts/maintenance or repair implements are imported along with the item. All such accessories /spare parts/maintenance or repair implements have been declared as separate items (and classified under the respective CTHs) in the Bill of Entry.

Note: If Accessory Status is either '1', please provide a brief description of all accessories provided as a part of the item in the field "Accessories of Item"(position 16)

Item category : Scheme code under which the import is being done has to be mentioned
Refer Scheme Code Directory at Annexure A.

Country of origin : Refer Country Code Directory at Annexure B

Quantity : Quantity as per invoice has to be given

Quantity as per CTH : If the unit of measurement of invoice does not tally With the CTH Directory, quantity as per tariff has to be given in this column.

Quantity as per CTH : For some tariff heads, there are two quantity as per unit of measurement of the second specific rate has to be given.

Additional Notification 1 : Exemption under goods of Special Importance Act.

Additional Notification 2 : Exemption for Special Excise duty – Schedule II

Other Notification : Exemption under

Textile & Textile ArticlesAct

Additional CVD Notification: Additional CVD notification and serial number applicable for 019/2006, 020/2006 as per the budget 2006.

SVB Load : ***P*** Provisional

***F*** Final

| | | |
|---|---|---|
| Previous BE details given. | : | Previous BE details through which same item was imported is to be |
| Unit quantity code | : | Refer Directory at Annexure D |
| Brand name & Model | : | Must be given. If not applicable declare as "N.A." |
| RSP applicability? (Y/N/Q/T/D) | : | If entered as 'Y', RSP details need to be provided. If entered as 'N', RSP Details need not be given. As soon as CTH is provided RSP applicability enables depending upon the CTH. But under certain circumstances RSP is not applicable even if it is enabled . These circumstances can be divided into three conditions or flags i.e Q, T, or D. 'Q' indicates rule 3A as per legal metrology act. If quantity of goods is more than 25 kgs then it comes under bulk quantity and RSP cannot be applicable. Other flags 'T' indicates Institutional consumer and 'D' indicates Industrial consumer. For both these flags rule 3B as per legal metrology act implements. Either the goods coming for hotel or any institution or for industrial use. In both these cases RSP is not applicable. |

Item Manufacturer country: The country where goods are manufactured.

CETH with the implementation of GST there are some items for which Central Excise is not applicable. User has to quote "NOEXCISE" for such items.

***Social Welfare Notn and Social Welfare Notn Slno : As per Budget 2018, names of CEX Educational Cess Notn and CEX Educational Cess Notn Slno are changed to Social Welfare Notn and Social Welfare Notn Slno.**
**For Social Welfare Notn:**

**" For claiming exemption under the notification 024/2011 for copper concentrates, RSP applicability Flag may be declared as "C" in the item table of the Bill of Entry. Further, in the RSP table, the notification 024/2011 has to be provided and the value of the gold + silver has to be entered in the RSP column."**

**"In case of Exbond BE, incase of In-bond transfers, flag "S" in RSP Applicability column against each item. Correspondingly, the last transaction price should be indicated in RSP Amount column with "SALE" as RSP Notification Column in RSP Table."**

Whenever FTA Notn is claimed at the item level, Transit country is mandatory for these items. It can be the same or different than the country of origin

**CAVR for Linear Alkyl Benzene : UQC of KGS is Mandatory for CTH 38170011**
**CAVR for Stainless Steel of J3 grade : UQC of KGS is mandatory for CTH 72191200, 72191300, 72191400, 72192390, 72193290, 72193390, 72193490, 72193590 ,72199012, 72199013, 72199090, 72202029, 72202090, 72909022, 72209029 & 72209090.**

**Note :**

**18A-A, if any existing notn is to be removed from item, value '000' is to mentioned.**

**Note 1:**

Inward Date: This field is NOT required in case of PRIOR BE.

Gateway IGM No.: This field is applicable ONLY in case of ICD IGM. It will be NULL in other cases.

Gateway IGM Date: This field is applicable ONLY in case of ICD IGM. It will be NULL in other cases.

Gateway Port.: This field is applicable ONLY in case of Transshipment cargo. It will be NULL in other cases.

**Note 2:**

In case of Sea-to-Sea Transshipment, since there is no local IGM, the Gateway IGM No., Date and Inward Date fields need to be provided in the IGM No., Date and Inward Date fields.

**Note 3:**

The above changes have been made in order to accommodate Sea-to-Sea Transshipment cases while keeping the message format unchanged. Limited changes in nomenclature, option and interpretation have been made as per the above format and explanatory notes 1 and 2.

Accordingly, minor modification in the flow of the remote filing packages like RES will benecessary.

**Note 4:**

Pbe_amend can be used to amend

(a) Mawb_no an date when BE is filed as Advance/Prior BE and mawb_no is decalred as 'NOMAWB' or 'NOMBL'. In this case Hawb_no is Mandatory and it should match with the hawb_no declared in prior/advance BE.

(b) When mawb_no/dt or hawb_no/dt declared wrongly

(c) To regularise BE (if auto regularisation fails)

**Note 5:**

In case SEZ –Z Type BE <TABLE>IGMS is required, for other types (T ,M,V,S) this segment is not required to be declared.

**Note 6:**

In case of Importer type S,V,A this segment is not required to be declared.

**Note 7:**

In case of Importer type H (Hand Carriage Jeweller) this segment is not required to be declared.

**Note 8:**

In case of Importer type T & M for Warehouse BE in SEZ (from SEZ to CBW movement) this segment is not required to be declared.

**Note 9:**

In case of Importer type W for Z type in SEZ (from CBW to SEZ movement) this segment is not required to be declared.

| 14. | Info_uqc | C | 3 | O | O | O | X | O |

**Please refer to the Agency-wise filing guidelines and directories for the codes and code qualifier.**
**The Value is to be provided in either Code, Text or Msr and not in more than one field.**

**Serial No 9**

The info_type field would be populated with the following values:

i) IDT - This value is to be chosen when item id type is to provided.
ii) CTG - This value is to be chosen when item category details are to provided.
iii) CHR - This value is to be chosen when item characteristics are to provided.
iv) PNM - This value is to be chosen when product name is to provided.
v) PEC - PGA Exception Category
vi) ORC - Origin Criteria

PGA Exemption category needs to be entered in cases where some exceptions have been specified by the concern agencies and NOC is not required for these cases.
ORC (Origin Criteria) needs to be entered in cases where FTA notn needs to be provided.
These values must be fetched from ***d_info_type*** directory.

**Serial No 10**

The qualifier information would be populated from ***d_info_qfr*** directory. The appropriate qualifier would be selected according to the type of information given in serial no 9. Look up tables and directories are available for some of the qualifiers such as Plant variety (**PQC**) and Plant parts**(PLP)**. For other qualifiers text needs to be entered. For eg.if Animal passport number 'PAS' qualifier is selected then the same should be provided in serial no 12 viz. info text field.

**Serial No 11**
The info code field would be populated from ***d_info_code*** directory based on the qualifier information selected in serial no 10

**The following values needs to declared in the Single Window Declaration for every item for SUQC**
Info_type : CHR
Info_Qualifier : SQC (Statistical Unit Quantity code for Customs)
Info_msr : to be declared a per tariff UQC
Info_uqc : UQC declared should be as that of UQC in ITCHS for that CTH

**Mandatory SIMS Registraton Number and Expiry Date**
The following additional declaration should be made in the Single Window Declaration
for HSN Listed in the notification on SIMS
Info_type :PNM
Info_Qualifier :SIU
For All the applicable cases
Info_code :SIUNAPL
Info_text : <STL><Numetic>/<DDMMYYYY>
(Actual SIMSURN, i.e. SIMS Registration number should be give after prefix STL in the above format in info_text Column. The date indicating the Expirty date. e.g. STL123/10122019)
For Air Shipments
Info_code :SIUNAF
Info_text : SIUN000
For Returnable Racks
Info_code :SIUNRR
Info_text SIUN000

**Capturing of COO details :**

(a) Whenever FTA notn is claimed at the item level, following things are mandatory in sw_info_type table

| Details | Info type | Info qfr | Info Cd | Info text | Comments |
|---|---|---|---|---|---|
| Certificate of Origin Particulars | ORC | COO | Issuing Country Code | COO Number\|Issue Date | Issuing Country Code will be mandatory. In case of back to back COO, country code of issuing authority has to be given which may be different than the country of origin |
| Origin Criteria | ORC | ORG | COWO/COOG/COOP | General Rule/PSR, as applicable | COWO - Wholly Obtained<br>COOG - Others (General Rule)<br>COOP - Others (Product Specific Rule)<br>info_text will be expected |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | and be mandatory only when info_cd is COOG or COOP. For COWO, info_text should not be given |
| Accumulation/Cumulation | ORC | ACM | Y/N | | |

**Additional information captured along with the Existing for COO**

| Details | Info type | Info qfr | Info Cd | Info text | Info UQC | Comments |

| Direct Consignment | ORC | DC | Y/N | | | |

**Declaration in r/o ADD(Anti Dumping Duty), CVd (Countervailing Duty) & Safeguard Duty(SGD) for M Type SEZ BE**

For Every item the following needs to be declared in the Single Window Declaration.

| Details | Info_type | Info_qfr | Info_code | Info_msr |
|---|---|---|---|---|
| Anti dumping Duty | DTY | ADD | Y/N | If info code declared as Y then this is to be declared as per the duty involved in manufactured goods. If declared as N then info_msr should have 0 (Zero) |
| Countervailing Duty | DTY | CVD | Y/N | |
| Safeguard Duty | DTY | SGD | Y/N | |

**CAVR for Stainless Steel :**

**Grade of Stainless Steel must be mentioned in the BE in Single Window table as follows**

| INFO TYPE | INFO QFR | INFO CODE | INFO TEXT |
|---|---|---|---|
| CTG | GRA | J3 | |
| CTG | GRA | OTH | " Grade of the steel to be mentioned" |

**Authorised Person (AP) for SEZ Z Type BEs (Applicable only for Z Type BEs and not Mandatory)**

| INFO TYPE | INFO QFR | INFO CODE | INFO TEXT |
|---|---|---|---|
| SEZ | ATP | Auth person ID No | Authorised Person Name. |

**Auth Person Id : Any Id no. like PAN/CHA No etc**

**Declaration of additional qualifiers in respect of Hand carriage.**

| Info type | Info qfr | Info text | Comments |
|---|---|---|---|
| HAC | HACID | GEMS/SAMPLE/PROTOTYPE | Mandatory<br>Importer has to declare<br>(i)GEMS in case of Gems & Jewellery.<br>(ii)SAMPLE in case of Samples<br>(iii) PROTOTYPE in case of prtotypes |
| HAC | HACWH | Private Bonded Warehouse code/PORT | This is required when HACID is either SAMPLE or PROTOTYPE<br>If goods are taken to warehouse then Private bonded warehouse house code is to be given in info text column<br>if it is to be examined in the port of import then 'PORT' is to be given |
| HAC | PAXNM | Passenger Name | Mandatory |
| HAC | PPNO | Passport Number | Mandatory |
| HAC | PNR | PNR Number | Mandatory |
| HAC | TKTNO | Eticket/Ticket No. | Mandatory |

**Declaration of Meity CCDC Details.**

Whenever Notn 050/2017 slno 237 is claimed at the item lever, following are mandatory in sw_info_type table

| Info type | Info qfr | Info Code | Info text | Comments |
|---|---|---|---|---|
| CHR | CCDC | MEITY | CCDC Number\|Issue Date (ddmmyyyy)\|Itemslno | CCDC number is E File Number issued by Meity. Issue date should be given in 'ddmmyyyy' format. COO and issue date and Itemslno should be separated by pipe (\|) delimiter. |

**Declaration of CBW (Customs Bonded Warehouse for SEZ to CBW and CBW to SEZ Movement)**

If imp. Type is T or M for W type BE in SEZ or imp type is W for Z type BE in SEZ importer has to declare the following.

| Info type | Info qfr | Info text | Comments |
|---|---|---|---|
| SEZ | CBW | Warehouse Code (Customs Bonded Warehouse) | Valid Customs bonded warehouse is to be given in info text column |

**Declaration of Buyer SEZ Code for SEZ to SEZ Movement (Inter SEZ Movement)**

If imp. Type is B or F for Z type BE in SEZ importer has to declare the following.

| Info type | Info qfr | Info text | Comments |
|---|---|---|---|
| SEZ | SEZ | SEZ Unit Code | Valid SEZ unit code is to be given in info text column |

| | |

**Serial No 9:**

"Control" is the international term used for any inspection, checking, examination, testing, scanning, screening or verification by authorities. This table is used to record the date, place, and result of control of goods before the import shipmentarrives

**Sec65 XBE :**

Warehousing under Sec 65 is done for manufacturing within the warehouse. The finished product can be cleared for home consumption (XBE is filed for WBE items and final product sold under GST Invoice)
In such a case, Importer has to declare the gst invoice details in this table, which is explained below

| | | | | | |
|---|---|---|---|---|---|
| Control Type Code | --- | SEC65 | Control Location | --- | Warehousing Code |
| Control Start Date | --- | Warehousing date | Control End date | --- | GST Invoice Dt |
| Conrol Result Code | --- | GST Invoice No (16 Char) | | | |
| Conrol Result Text | --- | CTH followed by Goods Description of Finished Product(both separated by any Delimiter) | | | |
| Control MSR | --- | Quanity | Control UQC | --- | Unit Qunatity Code |
| Control Slno | --- | Serial No. of GST Invoice (An Item can have Multiple GST Invoice) | | | |

**M Type SEZ BE:**

Importer needs to voluntarily give the declaration of Z Type SEZ BE details (used in manufacturing of goods) at BE master level .

| | | | |
|---|---|---|---|
| Invoice Serial No | : 0 | Item Serial No | : 0 |
| Control Type Code | : SEZ | Control Location | : Z BE filed/cleared Location code |

| | | | |
|---|---|---|---|
| Control Result code | : Z Type BE No. | Control Start Date | : Z Type BE Date |
| Control Result Text | : Invoice Sr No (Z Type) | Control Slno | : Item Sr. No (Z Type) |
| Control MSR | :Quantity | Control UQC | : Unit Quantity Code |

**T Type SEZ BE:**

Importer needs to mandatorily give the declaration of Z Type SEZ BE details for each item at BE invoice level and item level .

| | | | |
|---|---|---|---|
| Invoice Serial No | : T Type BE invoice Number | Item Serial No | : T Type BE Item number against inv slno. |
| Control Type Code | : SEZ | Control Location | : Z BE filed/cleared Location code |
| Control Result code | : Z Type BE No. | Control Start Date | : Z Type BE Date |
| Control Result Text | : Invoice Sr No (Z Type) | Control Slno | : Item Sr. No (Z Type) |
| Control MSR | :Quantity | Control UQC | : Unit Quantity Code |

For all the items in the T Type SEZ BE, one record (only one record) should be there in this control table giving information of its corresponding Z Type BE. Also, UQC for T and Z type should match at item level. All the Z type BEs should belong to same unit where T type BE is filed.

**W Type SEZ BE with imp. Type T (from SEZ to CBW )**

Importer needs to mandatorily give the declaration of Z Type SEZ BE details for each item at BE invoice level and item level .

| | | | |
|---|---|---|---|
| Invoice Serial No | : W Type BE invoice Number | Item Serial No | : W Type BE Item number against inv slno. |
| Control Type Code | : SEZ | Control Location | : Z BE filed/cleared Location code |

This is required for all commodities and is mandatory for every declaration.

**Declaration Type is to be given as B as default.**

**Statement Type could be REM, UTG or DEC.**
**DEC - Declaration – To Use Statement Code – Statement Text would remain blank**
**UTG - Undertaking – To use Statement Code – Statement Text would remain blank**
**REM – Remarks – To be given as free Text – Statement Code would be blank and Free Text given in Statement Text.**

**Exceptions where any mandatory document may not be required :**
**In some cases, an Item even though matches with cth of mandatory uploading of documents, may not require a particular mandatory licence or permit. For example, certain doc codes issued by FSSAI and AQ may only be needed if the goods are of good grade or animal origin. For such items, an importer can instead declare the reasons for not including a mandatory doc code in the statement table of the BE. For all the items against which any of their corresponding mandatory doc code is not included in the supporting document table, the importer must declare the following in the statement table of the BE :**

**Statement Type - REM**
**Statement Code - The doc code of the mandatory document not uploaded**
**Statement Text - Reasons why the mandatory doc code is not applicable on this item.**

Notes:

**Explanation**

This table is mandatory for all Bills of Entry .This table includes details of all supporting documents submitted by a CHA/Importer to Customs.

**Sr. No. 13**

**Image Reference No:** The CHA/Importer receives this unique number when he digitally signs a digital copy of a document in pdf format (scanned from hardcopy or otherwise rendered into pdf) and submits the supporting document to ICEGATE. This will be auto-generated by when ICEGATE completes the upload process.

**Sr. No. 14**

**Document Type Code**

All supporting documents which are submitted by Customs Broker / importer have a document type. Use the appropriate code for the document type code for the document referenced by the unique number. Directory will be provided.

**Sr. No.15**

**Document Issuing Party Code**

Optional field

**[Presently, this field is not validated]**

**Sr. No. 20**

**Document reference number**

If the supporting document is an invoice indicating the same invoice number quoted in <TABLE> INVOICE of the Bill of Entry.

**Sr No. 21**

**Place of Issue**

Name of the city/town where it was issued.

**Sr. No. 22**

Document Issue Date

(Date Format) No validation required.

**Sr. No. 23**

**Document Expiry Date**

This is used for Supporting documents that are registrations, licenses, certificates, permits and other forms of authorization.

**Sr. No. 24**

Document Beneficiary Party Code

If the document type is a registration, license, certificate or a permit, indicate the IE Code of the party which is shown as the beneficiary of this document.

**[Presently, this field is not validated]**

| 21. | Amendment Number | 7 | N | O |
| 22. | Amendment Date | | Date | O |
| 23. | Appraising Group | 3 | C | O |
| 24. | Table Segment Name | 10 | C | O |

**Note:**

* K/X:Key Field if original message is Fresh BE. NULL if original message is Amendment BE.

On processing of the message CACHI01 submitted by CHA/Importer, the ICES application would generate a positive or negative acknowledgement.

Guidelines for generation of the message are as given below:

**Positive acknowledgement against Fresh BE message**

This message is generated when a Fresh BE message (CACHI01) is accepted in full and there is no error. Error Code is marked as '00'. BE Number (and date) and Appraising Group ID is generated. The ACK message in this case should have a single record specifying the following fields:

| Fields | Remarks |
|---|---|
| Message Type | Always F |
| Custom House Code | Key Field |
| User Job No. | Key Field |
| User Job Date | Key Field |
| BE Number | System Generated information |
| BE Number | System Generated information |
| Error Code | 00 (Fully accepted) |
| Amendment Number | Always NULL |
| Amendment Date | Always NULL |
| Appraising Group | System Generated information |
| Table Segment Name | Always NULL |

Rest of the fields should all be NULL.

## Positive acknowledgement against Amendment BE message

This message is generated when an Amendment BE message (CACHI01) is accepted in full and there is no error. Error Code is marked as '00'. Amendment Number (and date) is/are generated. The relevant table segment name is also specified against each record. The ACK message in this case may have multiple records (one for each amendment record as in message CACHI01) specifying the following fields:

| Fields | Remarks |
|---|---|
| Message Type | Always F |
| Custom House Code | Key Field |
| User Job No. | Always NULL |
| User Job Date | Always NULL |
| BE Number | Key Field |
| BE Number | Key Field |
| Error Code | 00 (Fully accepted) |
| Amendment Number | System Generated information |
| Amendment Date | System Generated information |
| Appraising Group | Always NULL |

Rest of the fields is to be specified as applicable for a particular record.

## Negative acknowledgement against BE message (Both Fresh and Amendment)

This message is generated when a Fresh/Amendment BE message (CACHI01) is rejected due to error. Wherever exists, Error Code (may be multiple) are marked against each incoming record. No BE Number or Amendment Number is generated. The ACK message in this case may have multiple records (one for each invalid record in message CACHI01).
These records will have Error Code other than '00'. The valid records (marked with Error Code = '00') will not be included. All relevant key fields will be specified as applicable. Following rules will apply:

| Fields | Remarks |
|---|---|
| Message Type | Always F |
| Custom House Code | Key Field |

| | |
|---|---|
| User Job No. | Key field against a Fresh Message. Always NULL against Amendment Message. |
| User Job Date | Key field against a Fresh Message. Always NULL against Amendment Message. |
| BE Number | Always NULL |
| BE Number | Always NULL |
| Error Code | Other than 00 |
| Amendment Number | Always NULL |
| Amendment Date | Always NULL |
| Appraising Group | Always NULL |

Rest of the fields is to be specified as applicable for a particular record.

**LIST of Error Codes (For Acknowledgement Message):**

| Message ID | Error Code | Error Description |
|---|---|---|
| **Table:** | | **Vessel Details** |
| CACHI01 | 00. | Record Accepted |
| CACHI01 | 01. | Incorrect Message Name / Type |
| CACHI01 | 02. | |
| CACHI01 | 03. | |
| CACHI01 | 04. | |

For full and latest error code list, refer to ICEGATE website

Note: Error Code field may be multiple for a record. In such case, the codes will be clubbed together and separated by the delimiter '|'. As for example:
'02|05|11'

# 6 Message: CHCAI04: Processed BE

| | |
|---|---|
| ***Message ID*** | **CHCAI04** |
| ***Message Description*** | **Processed Bill of Entry** |
| ***From*** | **Customs** |
| ***To*** | **Customs House Agent/ Importer** |
| ***Message Extension*** | **.chl** |

| Sr. No. | Field Name | Field Length | Field Type | Fresh |
|---|---|---|---|---|
| 1. | Message Type | 1 | C | F |
| 2. | Custom House Code | 6 | C | M |
| 3. | BE Number | 7 | N | M |
| 4. | BE Date | | Date | M |
| 5. | CHA/IEC User Id | 20 | C | O |
| 6. | Challan Number | 10 | C | O |
| 7. | BE Print File Location | 60 | C | O |

On completion of assessment by the Customs Officers, ICES generates an assessed BE.
Print-out can be taken from the Service Centre.

# 7 Message: CHCAI05: Query raised by Customs Officer
